

Unified Communications Console Overview

- Designed to be efficient and easy to use while providing convenient access and control over your VoIP Doctors Hosted PBX platform.
- Empowers Administrators with comprehensive management tools for remote and on-site phones, as well as customizable features and functionality such as Ring Groups, Faxes, and Call Forwarding.
- Admins may:
 - Grant granular User access to permit Users to view/ manage their own call history, voicemails, call recordings, and more.
 - Provision a phone or softphone (mobile device or computer) with ease.
- Mobile Optimized – No App Needed! Our Web Console is designed to function with ease on any browser on any device.
