

# VoIP Doctors and Microsoft Teams Direct Routing:

An Efficient, Secure, and Convenient Unified Communications Solution for Teams and the Microsoft Phone System

## Service & Device Solutions for Microsoft Teams Direct Routing

We offer a full portfolio of solutions for Microsoft Teams Direct Routing that empowers organizations with tools for Communication, Productivity, and Collaboration. Your professionals have flexibility to be at their very best in meeting rooms, in-the-office, on-the-go, and while working remotely. Our preferred hardware provider, Yealink, is a Microsoft Gold Communications Partner to give you a leading edge and added peace of mind.

 **One-stop Solution Provider**

 **Simplicity of Experience**

 **Easy Deployment & Remote Management**

 **Global Coverage & Support Services**

With almost 300 million users worldwide, Microsoft Teams is one of the top communications platforms for interoffice collaboration and video conferencing.

## WHY USE MS TEAMS AS A PHONE SYSTEM?

- Several types of Office 365 licenses include Teams Phone functionality.
- It is one of the most cost-effective solutions (for non-call center applications).
- Most users are already familiar with Teams.
- Teams integrates, through Microsoft, with a vast number of CRMs and other productivity applications.
- Teams is a cross-platform application that works on Windows, Mac, Android, iOS, and web browsers.

## HOW ARE VOIP DOCTORS DIRECT ROUTING SOLUTIONS DIFFERENT FROM PURCHASING THROUGH MICROSOFT?

- Pay for what you need. Where Microsoft requires a 1:1 ratio of user licenses to call path purchases, we provide the flexibility to purchase only the number of concurrent call paths that your organization needs.
- Hands-on, expert support with true service customization available for your organization.

## ARE DESK PHONES REQUIRED TO USE TEAMS AS A PHONE SYSTEM?

- While there are excellent desk phones that are designed for Microsoft Teams, they are not necessary.
- Place and Receive calls from the Teams app on your computer, laptop, mobile phone, and/or web browser.

## NO POWERSHELL SCRIPTING OR COMMANDS NEEDED!

- With a simple sync, our Direct Routing Solution updates most routing policies, assigns phone numbers, and enables the phone dialer (for users with assigned phone numbers).
